Navigate with unbridled courage through 10 treacherous Terror Zones, each ending with its own mortifying Mayor. Only by penetrating their very beings can you hope to obliterate them. Along the way you face relentless attacks from Bazooka Heads, Spores, Monoliths and other monstrosities too unspeakable to mention here. And even with power-ups you may not survive The Dunes of Doom, The Carbonation Zone, and The Gauntlet.

But if you do, you'll find yourself in Bacterion's Lair. Here it will be decided whether you become a hero or an insignificant speck of cosmic dust.

Available now!

THE STATE OF THE INDUSTRY

It is a welcome honor to once again be contributing to the editorial page of Electronic Gaming Monthly magazine. Much has changed, both at EGM and in the industry at large, since the last time I contributed to this section of the magazine almost a year ago, but these important events have done nothing but strengthen my belief that video games are here to stay.

In your hands you now hold the largest video game magazine ever made for American game players. It's the culmination of many hours of fun and games, not to mention a strong commitment made to you by both the staff of EGM and the dozens of video game publishers that are now producing softs for systems ranging from the Nintendo to the Super NES. The industry recognizes the important role we play and many of the most important companies have chosen to use our pages to deliver their important messages to you.

From the very beginning of EGM our goal was to always deliver the hottest information, be it a game system in secret development or a hidden playing tip, and with dozens of exclusive announcements we feel we've fulfilled this job with info as good as can be found. EGM now has representatives in both Europe and Japan and has continued to expand its global reach by forming World-Net, a special organization of leading video game magazine publishers. We have always tried to be prompt in our reporting and, as always, we greatly appreciate any feedback you can give us on our performance.

We've also reached out to our advertisers to create interactive inserts that will not only attract you to new games, but will also be helpful in playing your favorite titles. In this issue Atari has provided you with a special 32-page mini-magazine that highlights their new library of games, not to mention similar supplements from SNK Home Entertainment and Electric Avenue.

You'll also find a new regular feature in this edition of EGM! Through a special agreement with the American Amusement Machine Association, the governing body of the coin-op video game industry, EGM will represent the arcade game manufacturers with a section that focuses on the high-tech advances that these games possess over their smaller console counterparts. Be sure to check out our coverage of the AMOA convention as well as the first pix of Teenage Mutant Ninja Turtles 2!

Many of your most popular sections have also been expanded thanks to EGM's new size and scope! You'll find not one, not two but three Super Play specials, with mega maps and intense game tips on Ninja Gaiden 3, Sonic the Hedgehog and Super R-Type. Other features include Batman-The Return of the Joker, Rolling Thunder 2 and Super Ghouls and Ghosts which is part of our Super NES special.

In short, EGM gives you more! More tricks, more maps, more reviews and more pages! While other video game magazines are giving you less info and increasing their cover price by as much as a dollar, EGM is providing almost three times as much news, reviews and previews for the same low price! While it may not be true of the other guys, the only thing you'll ever see EGM increase is the size of the magazine!

I wish to thank you for supporting EGM over the past year and hope that you enjoy the many new and exciting additions we have planned for all of our video game publications in 1992. You can rest assured that EGM will remain the biggest and best thanks to your loyal support.

MORE NEO-GEO..!

Back in March you published one of my letters to the editor. My question dealt with the reasons why you were giving so little coverage to the Neo-Geo system. You then said that you would be the sole magazine to rate their carts; you even reviewed Magician Lord and Ninja Combat. You said that I should not let my subscription die out because EGM would be reviewing the carts. Now it's almost September and there have been no more reviews. What happened?

Michael Daley
Long Beach, CA

The new 2 player action/RPG game - Crossed Swords for the NEO-GEO.

(Ed. We had planned to begin our NEO-GEO coverage that very next issue but it took longer than expected to arrange for loan carts. Rest assured, everything is now in place and our NEO-GEO coverage starts this very issue! Check out our exclusive 16 page NEO-GEO insert beginning on page 19! As usual, it's here first, and then only in EGM! Enjoy!)

ON THE TAKE?

Everyone knows that this mag has the best coverage, info, and pics. Many people, including me, usually use the ratings as a guide of what to buy, and also as reassurance of a new purchase. However, the fact that this (and all) mags run on advertisers' support sties up an important issue: Do the ratings tend to support games from high-pay-

ing advertisers?

Renovation Products and Electronic Arts are two examples of (what looks like) strong advertisers. I own a Genesis and look at the ratings from games produced by these manufacturers. Sometimes, however, it seems as though these ratings are somewhat 'curved' for these companies. Are you urged by companies to rate games higher because they buy a lot of ads? How is this problem dealt with? Are ratings just unpressured, honest ratings or not? Or are there 'under-the-table' dealings with some or all of the companies? Let your readers know!

Brian Gottlock
Nanuet, NY

(Ed. You bring up a lot of very good questions Brian. The two companies you mention are indeed 'heavy' advertisers in not only our magazine but also in most of the others. Are we influenced by that? Definitely not! Do we 'skew' our ratings for them? Again, no way! Check our track record. Budokan got a 3,3,4,5; Tour de Thrash got a 3,4,3,4; James Pond got a 4,4,3,6. Hardly impressive ratings! Final Zone for Renovation got a 4,5,4,5 - again well below average. Do the 'big' companies get good ratings - perhaps. But, not because they are influencing people. The large companies are the ones who can afford spending much more time (and money) in developing, programming, testing and fine-tuning their products. That is why John Madden gets all 9's and Gaiaros an 8,8,9,9. Our ratings

consist of 4 (not just one) independent opinions. Actually it's not hard to tell who is 'skewing' their ratings. Rent the game, evaluate it yourself and check how all the mags reviewed it. It won't be too difficult to tell who rates high!)

THE GREAT DEBATE...

SUPER-NES vs GENESIS vs TURBO

Dear EGM, I was wondering what is better, Genesis Turbo or the Super NES.

Robby Carbone
Helmet, CA

(Ed. Way back in issue 8 we posed the question as to whether the TurboGrafx or Genesis is better. Now the S-NES is out and hundreds upon hundreds of letters have come in similar to the one above. Most players are very opinionated, usually in the direction of the system that they own. Below are three to start off the great debate. How do you feel? What are your opinions?)

When I saw the Super NES I couldn't believe my eyes! I have to tell you that it has the ugliest design since the Atari 2600 or Intellivision. They need to go back to the drawing board. If I had one I'd hide it under some sort of cover! Ugh! The Japanese Super Fami locks hot! Why did they make such drastic (and stupid) changes? The only good thing is the 6 button controller. And what's with the dorky names? Can't they do better than that?

Styling aside I think Nintendo is too late to even compete with the Genesis. Genesis is on their second generation of games while Nintendo is floundering around with losers that are plagued with slowdown and flicker. Genesis has the sports and RPG categories already locked up. For my money I'll take Streets of Rage over Final Fight; Gaiaros over Gradius 3 and Sonic the Hedgehog over Mario 4! The Genesis cruises at over 7 Mhz while the S-NES limps along at 3.5. Add in the CD-ROM to the Genesis and the S-NES is totally lame. There is NO comparison!

I own a Genesis and just bought the Super-NES. From the graphics, sound, play control and Mode 7, I believe that the S-NES blows the Genesis away. Don't get me wrong, I enjoy playing my Genesis and just bought some great games but it can't come close to what the S-NES can do. The graphics and sound are the best I've ever seen and heard, but the Mode 7 is what really puts the Genesis to shame. Yes, the Genesis can catch up to the S-NES but it will cost me another \$350 to get the CD-ROM. Granted there is some slowdown in some of the new S-NES games but if you recall the same problem occurred on the Genesis when it first came out. Give the S-NES programmers 6 months and they will solve the problem. Then where will the Genesis be? Having both, I'll take the S-NES any day!

**Brian McSwain
Sanford, FL**

What's the big deal? All I hear you do is rave over the Genesis CD-ROM. Then you say that most of the games will be Japanese RPG's and military simulations. And finally you say it won't be out until next summer! Forget that! The Turbo with it's CD-ROM will give you what you want NOW! They have the extra years of programming for their CD-ROM and it shows. Where can you get motion video in games (Sherlock Holmes)? Turbo! Where can you get the best sound (Y's 2)? Turbo! Where can you get the best action in a game (Valls 2)? Turbo! Add in the new games like Loom, Y's 3, Valls 3 and 4 and it Came from the Desert and you'll see there's no need to dream about what a nonproduction CD-ROM can do as you can have it all now with the Turbo!

**John Sikes

SUPER-NES IN SUPER VHS

I bought the Super-NES on it's release date and I worship it. Since I have a new monitor-style TV and I immediately hooked my S-NES using the audio/video cables. The graphics are crystal clear and the stereo is truly

mind blowing! According to an older issue of EGM, the next step up is to use the optional Super-VHS cable for this system. My question is, how much better can the picture get. Will the difference be noticeably better? Is the cable worth the extra 20 bucks?

**T.J. Rappel
Appleton, WI**

The Japanese Super Famicom Super-VHS cable works on the Super-NES.

(Ed. We have to agree that there is a world of difference between the standard channel 3 hookup and the one using the Audio/Video cable. The stereo sound and ghost-free picture is something that everybody should try.

The next step up - the Super-VHS cable does offer some improvement in the picture. The main difference is in the colors on the screen. There is somewhat less color fringing and overlap. Expect an improvement of about 10 to 15 percent. To many people this will not be noticeable. The price of the cable isn't overly excessive and it is worth trying. But don't expect to see a major improvement.)

MEGA-CD UPDATE..

Each month when I buy your magazine I find that issue is better than the previous. First I thought it was just due to the increase in size, but the content continues to improve also. I'm a devoted Genesis player and I find the MEGA-CD-ROM to be the ultimate accessory. Have you been able to learn more about this great item?

**Ron Ward
Newark, CA**

Sega/Micronet invited EGM to try out the new MEGA-CD-ROM.

(Ed. Indeed we have! For the full story check out this month's EG Express column starting on page 38. Sega and Micronet invited the "most important magazines in the world" to learn about, see, and try out production number 001 of the MEGA-CD-ROM. Ten magazines from Japan, one from Taiwan and only one from the U.S. (guess who!) were invited to attend this monumental announcement.

At this event Sega announced that the MEGA-CD-ROM will go on sale in Japan on December 2nd, plus or minus one week. All the specs announced previously have not changed and some further clarification and comparisons were made. Because of the huge 6 megabit of RAM, the MEGA-CD-ROM can produce motion video three times the size as those done in Sherlock Holmes for the TurboGrafx. Also with the ability to do biaxial rotation in hardware, arcade games like Assault can now be done. True flight simulators which require height, width and depth (the S-NES Mode 7 doesn't have the third dimensional capability) are possible for the first time on a cartridge machine.)

GREAT SEGA INSERT..!

I just got my copy of your October issue and I had to FAX you my comments. First, I get all three of the mags and I couldn't believe the difference. 82 pages, 118 pages and 204 pages. Your Sega insert (awesome!) was larger than your competitor's whole magazine! I used to think that all mags were about equal but now it is clear who really leads the pack. Your Sonic mags have to be seen to be believed and the Star Wars and Empire coverage blew away those who had special coverage! How are you going to top this in November!

**Noah Freer
Los Angeles, CA**

(Ed. As you can see from this issue we did top October's "telephone book size" mag. At 274 pages we have just created the largest issue of a U.S. monthly game magazine ever! Competition, what's that.)

FRUSTRATING GAME...

Since you claim to be the authoritative resource on video games, I am giving you your chance to solve my problem. I am having extreme difficulty in getting past the seventh level in *Battleloads*. It now is getting frustrating as I keep on dying and then have to start all over. It seems to take forever to get back to the seventh level just to try it again and die. Is there an easy way to get past this difficult spot?

Carl Leeb
Buena Park, CA

I really appreciate the special game tips you print, especially the maps and secret codes. I have been having trouble on *Battleloads*, however, and was wondering if you have found any special tricks or codes that will let me skip to the higher rounds so I don't have to continue restarting at the very beginning when all of my lives are gone. Can you help me?

Matthew Gold
New York, NY

(Ed. You're not the only players who have written in with problems on *Battleloads*. It is quite a difficult game and unfortunately, there presently aren't any known built in tricks like a level select for this game.)

There is help though, in the form of a brand new product due in stores shortly. It is called the *Game Action Replay* by *Acmore International Ltd.* of Harrisburg, PA. This spectacular device, as described in last month's *EG Express* column, allows you to store your position in any NES game (The memory is large enough to store your game up to 5 times). With a battery back-up you can even remove the cart and it won't lose the information! So, in your case, you could get to your tough spot, save the game on the *Game Action Replay* cartridge and then continue playing the game. Should you die and lose all your lives you won't have to start the game back at level one. Access your saved position on the GAR and begin again from your last position! Best of all, the GAR is a licensed Nintendo accessory so there won't be any problems like the *Game Genie* had.)

EGM AT CES...

First off, I would like to tell you that I had the pleasure of attending the CES in Chicago. What an experience! I had a wonderful time seeing all of the games and new technology that your magazine had informed me about so long ago.

I also want to tell you how proud I am of your publishing power and generosity at CES. You guys were so much more popular than any other magazine booth. I was there the first day when you ran out of all your magazines. Then you brought cartons of fresh issues, and from out of nowhere there was a huge flood of people who practically crushed me trying to get their hands on one. They cleaned you out in about 10-15 minutes! From the looks of things you really were a hot item!

Cord Barrett

(Ed. We did have fun at CES and there was quite a rush to get our new (at the time) *Terminator 2* issue. Over the period of the show we gave thousands upon thousands of copies away, including issues of our different magazines. You better get to our booth early at the January CES show Cord, because if the trade made a rush for our 'little' 128 page July issue, just think what they'll do to get our 272 page 'telephone book'!)

HOT NEWS

I have recently received your September issue and it's great. I like to look at the other mags too but they're just not the same. They don't have the news of tomorrow like you guys have. I was wondering, how do you guys get your news and who gets the information for you?

John Polson

(Ed. Getting the latest news is not a very easy thing to do John. It takes a lot of telephone calls and many special trips to where the action is happening. That could be anywhere from Japan to England. Luckily, we all get to share in writing the about the breaking stories from the industry!)

Nintendo - Sunsoft Batman 2

Type: Action Release: Dec.
Levels: 7 Difficulty: Avg.

The long awaited sequel to Sunsoft's hit game is here. **Batman 2: Return of the Joker** features larger characters than the first game as well as multiple scrolling backgrounds. The Evil Joker has returned and Batman must locate and defeat him. To do this, you must fight your way through 7 levels of action, past a whole new gang of bad guys to reach the ultimate goal - the Joker himself!

I really like the original **Batman** a lot and I have to say that the sequel lives up to the first game in most respects. The **new** characters have much more depth and detail and although the overall goal remains the same, the extra enhancements that Sunsoft has made are welcome!

Batman 2 really shows just how far 8-bit power can go. The parallax scrolling is quite impressive-almost 16-bit quality. The bosses are also detailed, with many different attack styles. Even though **Batman** has an entire arsenal up his sleeve, the theme of the cart is still exciting!

This cart has about the best looking visuals that **has** seen on the NES. Despite the **graphic** improvement there is something missing from this sequel that made the first so good. The game play is limited to a walk and shoot contest with pretty graphics and shallow game play.

Batman is back, but he's had a face lift this time! The **title** could easily be called anything if the **main** character didn't look so much like **Batman**. The **Batarangs** are gone and now one of my favorite **weapons** is strutting around with lasers strapped to his arm. Not bad, just not what I expected.

Nintendo - Capcom GI-JOE 2

Type: Action Release: Oct.
Levels: 14 Difficulty: Avg.

The Joe team is back and this time they're backed by Capcom! **Cobra Commander** is at it again; trying to rule the world as usual. This time, however, he has raised the lost continent of Atlantis from the depths of the ocean, but why? You must help the **Joes** stop his plans and defeat the intense commanders of the Atlantis project to send the continent back into the sea. **YO JOE!**

Like its predecessor, **GI Joe** has all of the elements of a hit action title, with fairly **cheap** backgrounds and a variety of **weapons**, but the game just doesn't convey the same brand of excitement that you'd expect. The enemies have little personality and the play is far from challenging.

GI Joe - is a Real American lorddom in this case. Even though the game allows you to **pick** your favorite muscle-bound troops, the graphics and music aren't as appealing as they could be. The game play, however, helps compensate for some of these shortcomings.

This sequel reminds me of the way the classic toy has changed from a foot to 3 inches tall. This cart just doesn't do **justice** to the **GI Joe** name. Sloppy controls and repetitive game play **take** away from any potential excitement. Typical for the NES! **YO NO!**

GI Joe isn't a bad cart at all with its Castlevania-type scrolling and action. Choose your favorite **Joe**. Cool! The graphics? Well, let's just say they're B-bit. Oh for the sound. Anyway, **GI Joe** is an action packed cart once you get the hang of the controls. Yo!

Nintendo - Tecmo Ninja Gaiden 3

Type: Action Release: Sept.
Levels: 6 Difficulty: Easy

Ryu is back for the final installment of the Gaiden trilogy. With the same type of action as the first two carts, Gaiden 3 carries on the continuing adventures of Ryu Hyabusa and his dragon sword. This time, Ryu is up against an enemy tougher than any he has faced before. It includes all new bosses, enemies, and original levels and music. If you enjoyed the first two, then get ready for number 3!

What has to be the best of the Gaiden series, The Ancient Ship of Doom makes up for the lack of difficulty and awkward controls that kept previous Gaiden games from being full blast. The theme has worn a little thin, but the action, sounds and graphics are still top notch!

Now this is a sequel! All of the classic power-ups and combat skills of the ninja remain at a 1-bit market have still been retained. An all new novelistic plotline has been added, along with new enemy designs as well. Everything from bosses to background are truly stupendous!

This is a player's game. Only 3 continues make this the perfect cart for those who have finished the first two carts. Making this a high stress cart, not recommended for wimpy gamers. Boasts great graphics and cool music, although the cinematics are kind of cheesy.

Ninja Gaiden 3 is a worthy challenge for anyone who has finished the previous quads. The graphics are the same, the music has that Ninja Gaiden "feel" and the control is comparable. Like the new power-ups and the cool levels. With only 3 continues, it's right!

Nintendo - Konami Where in Time is Carmen Sandiego

Type: Action Release: Nov
Levels: NA Difficulty: Avg.

Are you looking for the famous computer title Where in time is Carmen Sandiego? Well its here for the NES. With the same game play from the computer version, this will probably draw the attention of the computer players, who may also be Nintendo fans. A faithful translation from the computer, with its first person perspective and role playing type theme, this might be one to check out.

The whole Carmen series has proven to be a big hit on computers, but the slow pace of the game and need to refer to outside source material deflected original fun I was having on the computer. This title does have an important educational slant, but it's not for shooter fans!

A very important game for the NES. While it isn't a real action game, it does have enough of the action overtones to keep the pace of play quick and the need for interaction with the resource materials constant. A great learning game that's also a lot of fun.

Obviously a cart that will only reach a specialized group of players. Personally this game is a bit too boring and not fun for me. The mystery of finding Carmen is involving enough to draw you in, but this one will certainly not be a repeat offender in my book.

This title is a blast from the computer world of stardom. On the Nintendo, it comes off very well and offers a very interesting and sometimes educational game for all players. The music set the tone and neither are the sound effects, but the game play is easy to follow and fun.

Genesis - Electronic Arts Star Flight

Type: Strategy Release: Nov.
Levels: N/A Difficulty: Hard

With a combination of galactic conquest and ship to ship combat, Star Flight brings a very literal translation of the computer classic to Genesis screens. Patrol the universe, hunting out new planets, allies and enemies as you seek to expand your grip on power across the universe. With great attention to both the action, strategy and presentation, Star Flight duplicates the feel of the computer game.

Star Flight uses the same concept we saw in Star Control, combining action with the suspense of conquering the galaxy. Star Flight, though, has a much more interesting display, better interaction between the action sequences and among the systems, and a much more appealing tone.

There is very little in the way of "intense" game play to be found in Star Flight, but the overall theme is exalted extremely well. From the different types of strategy that can be employed to the occasional bout of combat, Star Flight represents a great example of a two theme hybrid.

At first I thought this would be another boring computer port and a waste of my time, but the cart shows a lot of promise. Exploring the solar system and landing on various planets is interesting and the game is highly detailed. Not spectacular but solid game play wins me over.

Another computer relative, Starflight blasts into regions unknown, displaying decent graphics and okay sound effects. For other Genesis exploration titles, this such detail, but maybe in the future, more designers will have the time to make good solid games like Starflight.

Devilish

Breaking Up Is Hard To Do.

Especially when you're playing this game. If you think you've seen this one before, you're right. And wrong. You see, our game is much, much, more complicated, with monstrous enemies, high-tech UFO's, and walls and walls of blockades. So we gave you two paddles, offensive and defensive, just to even up the odds. But don't get us wrong. You'll like this game. You'll just have a devilish of a time getting through it alive.

Genesis - Sega ToeJam & Earl

Type: Action Release: Sept.
Levels: 6 Difficulty: Easy

What happens when two hip rappin' aliens crash land on Earth? You can only find out in ToeJam & Earl. These two guys have to find the ten pieces of their spaceship, that have been scattered all over the game, to be able to return to their home planet. Sampled sound effects and humorous visual effects also add to the theme of this cart which tries to take the Genesis in a whole new direction.

Toe Jam and Earl is more of a testament to what the Genesis can do than a real game. You pass for the action, the guys need to locate all the pieces of their ship, it's really a window in which Sega throws some of the best graphics, sounds and music you'll ever see. Wears thin fast.

Master rappin' ToeJam and his big homie, Earl, are really one truly intense duo despite their poofs, one liners, and an entire cast of silly characters (the bouncer man being my favorite). Featuring funk with some hilarious 16-bit and to highlight this truly funky and bodacious cart.

ToeJam and Earl are two really funny characters complete with funny animations and a load of other humorous creatures to get you. Although I enjoyed most of this cart, especially the funky sound test, it was just a little too weak in the game play department. Aloha!

If you are waiting for a hilarious game for the Sega Genesis, this is it! The graphics are pretty, the tunes are undisputably the funniest anywhere and the humor is of this world! I recommend it for anyone who likes a good laugh. To Earl, who's Troide? No hedgehogs 'round here...

Genesis - Renovation El Viento

Type: Action Release: Nov
Levels: NA Difficulty: Avg.

Set in the 1930's, El Viento by Renovation is a great action game for the Genesis. An evil storm is washing down upon New York. The worshippers of Hestur, an evil outer world being, are planning to sacrifice a young girl to resurrect their evil illege. A young woman named Annet, must destroy the cult and their ambitions to rule the world, wielding a boomerang and powerful magic.

El Viento has got one of the greatest combinations of hot graphics and play action like you've never seen. While the theme is a slight side-scrolling, the action is presented with smooth animations, plenty of risk incentives and more than enough challenge! A winner in my book.

They've done it again! Renovation will never quit making good carts, will they? El Viento has similar ties in with a Power Blade spin of combat and a backdoor link with alien factions and awesome cinema displays! Great graphics and incredible play makes this a winner!

This cart has great game play along with stunning graphics and superior tunes. The best thing in this cart is the explosions and awesome and Bosses. Well and you see the bubble boss in action, it's totally cool! Well balanced game play makes this a superb action title.

El Viento is a great addition for anyone who liked Vals 3. The basic action is simple yet magical, with intense music and graphics and well produced graphics and sounds. A killer cart from start to finish that impressed me from beginning to end! Thumbs up!

Genesis - Renovation Vapor Trail

Type: Shooter Release: Nov.
Levels: N/A Difficulty: Hard

Another shooter for Genesis! As a fighter pilot, you get to choose from three of the latest, state of the art fighters before your mission. Many different types of power-ups, and an overhead perspective also highlight this cart. Multiple scrolling backgrounds and a wide variety of enemy artillery, including ground, and air vehicles round out the targets! Toss in digitized sounds and you get Vapor Trail.

Straight from the arcade we get Vapor Trail. Not the best game before and not the best now, but for a shooter this one does give a decent thrill. The action is heavy through most of the game, but the whole package just doesn't last long enough to earn a higher review.

Even though this cart does boast some unique options like 2-player combo action, it's still your basic shooter containing some the expected assortment of weapons and power-ups, but the best blast-em-up I've played, but no where near the worst either.

Vapor Trail is just not intense enough for my tastes. The graphics are decent and the music is OK, but the game is far too easy for an 8-Meg shooter. It's not easy, you know it, even sooner if the player go at it. What killed the cart is the consistently boring selection of power-ups.

From start to finish, Vapor Trail is an average shooter. The game's one plus, a two player simultaneous option, is welcome, but it only really succeeds in making the cart easier. The game suffers from slow-down, flicker, and miscellany that has been seen many times before.

IT'S 2 EXCITING 2 MISS.

It's twice the fun. Twice the thrills. Twice the craziness. That's right, it's The Bugs Bunny Crazy Castle 2. But Bugs isn't getting the royal treatment. This "looney" new adventure on the Nintendo® Game Boy® has Bugs being chased by the whole Looney Tunes gang, The Tasmanian Devil, Yosemite Sam, Wile E.

Coyote and other crafty characters. There are 28 huge and multi-level rooms. Giant catapults. Invisible traps.

Awesome sound. More than enough to keep you and Bugs hopping. Will Bugs succeed in his crazy attempts to rescue Honey Bunny? If you're a Game Boy® player, that's up to you. Their future is in your hands. So the sooner you start the better.

The Bugs Bunny Crazy Castle 2. Even better the second time around.

TurboGrafx CD - NEC Wanderers from Y's

Type: RPG Release: Nov
Levels: N/A Difficulty: Easy

Y's 3 continues the adventures of Adol, the legendary hero of Y's. Adol must once again rescue the people from turmoil. Armed with his sword, and all new magic, Adol is well prepared, but is it enough? This time the action takes place from a side scrolling perspective instead of the 3/4 top view as in the first disc. Animated cinema displays, and multiple scrolling back-grounds are also used.

While there's no denying the fact that CD games with long intermissions, music and sound are attractive, they need to be supported by good game play. Y's 3 is way too linear, with little quest left in the adventure. The action has been toned a bit, but it still is way too easy.

The magical power that is Y's has just returned! Even though this carries the genre at one awesome RPG, it's just way to easy! Fortunately, the voice and plot make up for more than what is lost. It's a great sequel that all fans of the original should check out!

I think that this disc misses the high marks of the original. The music is phenomenal and really jams on a good stereo system. The game play, however, is extremely limited. There is little or no challenge here and the whole quest is too straightforward for an adventure game.

Finally! A title that betters its predecessors! The game play is much more challenging. This time in the land of Y's you are saving your sword! About time! Gate Hyldide attack monstrosities the max! The quest is pretty cool, but the music will blow you away!

Turbografx CD - NEC Valis 3

Type: Action Release: Nov.
Levels: 7 Difficulty: Easy

The adventures of Yuko and her Valis sword are continued in Valis III for the Turbo CD-ROM. This time, Yuko is forced into battling Glemas, who happens to own the Leethus sword, the counterpart to Yuko's Valis sword. This time around, Yuko has the help of two new found friends who you can change into during play, one with a whip, the other with powerful magic. Animated cinema displays

Valis 3 is really a good example of taking the benefits of the CD-ROM technology and putting them with a very hot genre. The great, adventure, action, graphics, sounds, music and overall game play are killer from beginning to end. Give us more of this NEC and you can't go wrong.

This must be the month of the successive CD sequels! This game is truly a title that beat over the Genesis version, capturing even more levels, AWESOME cinemas, and some really intense game play with some great sets! I can't wait for the sequel!

Finally a Turbo game that blows away the Genesis version of the same name! Great music and cool cinema displays are definitely a step above the cartridge version. I don't like the mixed Turbo/CD sound-track, but it still sounds impressive. My one complaint is that it's easy.

Don't wait up! This is the best of the Valis Trilogy yet! With number four coming soon, Valis 3 is a must for those who are looking to keep up with the series. Anyway, if you want to follow along with the story, pick up this game and grab some headphones. The tunes are superb!

Gameboy - Konami Blades of Steel

Type: Sports Release: Dec.
Levels: N/A Difficulty: Avg.

Grab your stick and get ready for Blades of Steel Gameboy style! With all of the options from the first cart and some new ones added in. You can select a practice mode that lets you hone your skills in the fight scenes and penalty shots, to make you the best on the block. With your video link, you can really blow away the competition. Take on the same teams that you put to shame in the Nintendo version.

Good game play is a constant in this game, but there are a few flaws. While the blowing that complicates some Gameboy titles, with quick movements is evident, it's not as pronounced as it might be. I liked the Double Dribble style and additions of Blades - it's worth a look.

Blades of Steel is a great sports game that takes the GameBoy to the limit. Fast action with little or no smudging on the screen, combined with games within the game that include tight strategy, make Blades a winner with the good graphics and sound support the title.

Blades isn't that bad for a GameBoy title. The action is a little fast and blurs a lot but the game play is solid and fans of the NES cart will enjoy it. The addition of blow-ups is a Double Dribble also adds to the game as does the two-player and practice modes.

I don't think I'll ever really like a GameBoy game. Personally, I wish Nintendo would make the Gameboy extinct and go for an 8-bit NES portable! The graphics aren't that hot and the music is boring. It's far too difficult to follow the action on the GameBoy screen.

SUPER NINTENDO

THE YEAR OF THE DRAKKHEN.

This is the year of Super NES™. The year some of the best RPG players may go down in flames. Because this year you will enter the world of Drakkhen.

You've confronted many monsters before. But never fire-breathing beasts of such scorching realism. Over 50 giants and winged beasts in spellbinding 3-D. You've journeyed in other mystical lands. But none with scrolling,

360° landscapes with panoramic views. Horizons change from day to night before your very eyes.

In your quest to restore world peace, you will learn many powerful spells. Prepare for battle by collecting weapons and magical objects. But nothing will prepare you for the special effects, the eye-popping

graphics, the stereo digital sound experience. Drakkhen. It's the Super NES game of the year. The role playing challenge of a lifetime.

Gameboy - Taito Battletoads

Type: Action Release: Sept.
Levels: 6 Difficulty: Easy

The Toads are back for more on the Gameboy! With the same basic theme found in the Nintendo 8-Bit adventure, the toads use all of the same unique fighting moves that they used in their first adventure. This is a whole new adventure though, with original levels and Bosses. The game still employs the same detailed graphics as its Nintendo counterpart, and no play control is lost in translation.

I loved the Battletoads on the NES and I think they hold up just as well on the Gameboy. It's one of the few action games that really has the power to pump you back for more. GB Toads should be in common with its 8-Bit cousin and throws some new features in for good measure!

One of the best GameBoy games I've ever played! GB Battletoads takes the best portions of the original NES game and throws in just enough to make the adventure seem completely unique. A great game with all the back-up features done with a superb style!

The Toads actually make a pretty good GameBoy cart. The animations are still pleasing and the most of the funky moves are there as well. The music is not there and sounds great in stores. The game play is just as intense as the NES version and well-deserving of the name.

The adventures of the Battletoads continues on the Gameboy! Too bad the Gameboy is so limiting or this would have been a great title! The graphics and music are ruined on this inferior system. Look toward the Super NES. Battletoads, the GameBoy just doesn't do you justice.

Gameboy - Tecmo Tecmo Bowl

Type: Sports Release: Nov
Levels: N/A Difficulty: Avg.

Another sports game on Gameboy! Take your video link and a friend and play Tecmo Bowl on Gameboy! Same game play as the Nintendo version, and the same graphics and music are utilized. Pick from all the plays that you used in the Nintendo version. Also has a one player option for when your friends aren't home. Take on the usual pick of teams that challenged you the first time around.

Tecmo Bowl, another great game on the NES, has been translated nearly perfectly to the GameBoy. From the ability to use your NES codes to a great look and play mechanic, Tecmo Bowl is one of the best sports games I've played for the handheld Nintendo system. File it under hit!

Another great game from Tecmo! Tecmo Bowl is a fantastic translation of football from the programmers of one of the best sports simulations ever. Tecmo Bowl has the great looks, easy game interaction and the same codes as its 8-Bit brother to produce a superior hand-held cart!

For some reason, football on the GameBoy just doesn't sound right. This cart is good, but somewhere near the NES version. The fact that you can use all of your NES codes from the NES version really adds to this cart, but despite some nice play, the remains too slow for me.

Tecmo Bowl never impressed me on the NES, and with the low-tech afforded by the GB the title appears even worse! Tecmo Bowl was just slightly above average as an NES title, but on the Gameboy, Tecmo Bowl falls way short of scoring the same big points.

Game Gear - Sega Ninja Gaiden

Type: Action Release: Nov.
Levels: N/A Difficulty: Hard

The quest of Ryu Hyabusa is coming to the small screen. Sega is bringing us Ninja Gaiden Game Gear. A whole new world is opened for Ryu when he enters this game. With shorter levels, and a different type of play control, this game is definitely a change from the Nintendo version. Ryu retains his wall climbing skills, but his sword slash has changed, and he has all new weapons.

This game has an awkward look and style that reminds me more of Strider than Ninja Gaiden. Don't count aside, Ninja Gaiden for the Game Gear is a nice addition to the countless growing list of action carts, but it still comes up short on game play and, in some areas, graphics.

Although it plays very differently from the original Ninja Gaiden series or even the arcade version (which the Lynx is based on for that matter, GG Gaiden still has many special features that elevate its game play almost to the same level as its namesake!

This cart is just Strider with a strong-er license, namely the mega popular NES hit. What's the matter Sega, don't you have any faith in your own files? Good graphics and game play make this one a far better GG cart. The game is too easy and a password was not needed.

Ninja Gaiden is a good title for the Game Gear. It pulls off some awesome tricks for a newcomer to the portable scene. The graphics are good, and the music is well done. The original is the best, but when you need a rip for on the go, this is a good title to turn to.

...Super NES Has Rocky Start...New Games From Japan...Lynx Software...64-Bit Jaguar Update...
Super Nintendo Goes Coin-Op...More Sequels For Nintendo 8-Bit...

...Drop your lasers and fire your smart bombs! Quartermann has returned with a bag full of the hottest little secrets in the video game biz! The industry's been buzzing with insider info this month and the Q-Magnum has got it all in the only gossip column that doesn't use slow-mo...Whoa Nintendo, did you commit a faux pas and how! The new Super NES, which yours truly reported last week was compatible with the Super Famicom, has one slight problem running around inside its computer brain - it won't work on certain televisions made before 1985! While this problem is rumored to be corrected when the second batch of Super NES machines appear, several television broadcasts have already leveled their own firepower at the big 'N' because of the incident. And with Sega absolutely destroying Nintendo with their hyper cool comparison ads, you've got to wonder if Nintendo remembered to check the flight list before taking off...Games, games, games! On the red phone to head editor Semradlus in Japan, the Q-Meister has learned that several high profile titles are now on their way to the states! Leading the pack are the Teenage Mutant Ninja Turtles coming to the NES for their third adventure! With a new style of play that combines the role-changing of the first with the action and graphics of the second, this cart sounds most sharp indeed. Also on the play list are Street Fighter 2 for the Super NES, Mega Man 4 for the 8-Bit, and a flood of reflective donuts, er, I mean CD games for the new Sega Mega-CD driver! Check out a full report on the show with special commentary by our man in Japan, Terry Aki...

...Speaking of new games, Atari is set to unload a flurry of Lynx games ranging from Pit Fighter to a special hand-held version of Tecmo's latest ninja bloodbath, Ninja Gaiden 3 - The Ancient Ship of Doom. Can't wait to see 'em boys...While we're on the subject of Atari, Quartermann has the latest low-down on the Jaguar super system! Seems Atari is trying to make the game system, which is rumored to be nearing completion, much more than your everyday walk in the park, run-of-the-mill 64-Bit video game console. No, Atari is rumored to be making their new Jaguar a computer too! And what's more, you'll be able to not only play cartridges and possibly CDs, you will even be able to play VHS tapes! With two 32-Bit processors and a revolutionary graphics chip, the Jaguar has the potential, but it's not going to succeed without focus! Quartermann gives a big thumbs down to the idea of a video game system that plays computer games or a computer system that doesn't have the power to do my taxes. An Atari VP who leaked the Jaguar news to the Q-Mann said the company may keep the future of the Jaguar quiet until Atari can clearly see the direction the biz is buzzing and that no official press conference would be occurring soon. Right, better keep the PC on the QT or it may leak to NEC and that VP would go MIA when the arrives DOA...

...Get ready to play the best Super NES softs before they're released in the arcade! Mocking the success that the company's had with their 8-Bit coin-op model called the Play Choice-10, Nintendo is getting ready to flood arcades with upright 16-Bitters that play hits like Super Ghouls and Ghosts and U.N. Squadron. It's a cool concept but the controllers are just too hard to play with! It feels like someone stole my controllers and super glued them to the floor...Did you know that in Europe the Teenage Mutant Ninja Turtles are called the Teenage Mutant Hero Turtles. Why? Do they have a problem with ninjas? Let me guess, you can plunk down 40 quid for Hero Gaiden? No way...Sorry Doc, but someone should sue you for malpractice! Did you cheat your way through medical school or what?...

...Get ready for some rockin' sequels coming for the NES in '92! From the Turtles to Mega Man to Gaiden to Tetris the games seem to be getting slightly fewer and far between for this 8-Bit workhorse, but they're definitely improving on style. And no, it's not Face-Tris, Word-Tris, Wel-Tris or even Miss-Tris coming to the Nintendo, it's a whole new Tetris game called Tetris 2 - Bombliss! Looks hot. My screen says 'Game Over' (only because I beat the game of course) and it's time for me to fly. Until next time, don't lose the grip on your joystick and try not to lose your EPROMs...

BEHIND THE SCREENS AT MICRONET OF JAPAN

"THE MAKING OF MEGA-CD GAMES" - PART 1

The countdown for Sega's MEGA-CD-ROM has already begun! In previous issues of EGM we have discussed all of the technical specifications of this extraordinary system but what hasn't been talked about are the details behind the new software that will drive this powerful peripheral. This software has remained a secret until now! EGM has traveled to where the system will be launched - Japan - and brought back top secret info from two companies now working on Mega-CD softs. This month we interview the key people at Micronet of Japan while next month we'll go inside Sega itself to unlock the mysteries surrounding this new system and games.

MICRONET OF JAPAN

The first stop is Micronet, located in the city of Sapporo on Hokkaido - one of the northern islands of Japan and hundreds of miles from the booming metropolis of Tokyo. Micronet was established in 1983 when Mr. Akihiko Murakami started a small company to make entertainment software for personal

computers. The next year Mr. Isao Nakasugi was hired as chief programmer and game designer. Since then, Micronet continued to grow steadily up to the 30+ employees currently on staff.

Micronet's first Mega Drive Game - Curse.

MEGA DRIVE PROGRAMMING

Jumping ahead to 1986 when Sega's 16-Bit was in final development, Micronet moved from computer software to cartridge software. Taking a chance on this new market, Micronet brought out the intense shooter, Curse. After a strong performance, Micronet followed Curse with a puzzle game called Junction and then the military simulation cart Ambition of Caesar. The company topped them all, however, with a great translation of the arcade game Raiden. The company also started several Game Gear projects also.

CD-ROM...THE FUTURE

With several successful Mega Drive games under its belt, Micronet was not a company standing still. Having watched the PC Engine CD-ROM do well in Japan, they were one of the first companies to see CD-ROM as an

important part of Sega's future and immediately signed on board when the MEGA-CD-ROM was announced. That commitment took place nearly one year ago.

However, Micronet understood that the new system, while more powerful, would possess new challenges for the developers now

program for this new format. Having seen the preliminary specs on the MEGA-CD-ROM, chief programmer Mr. Isao Nakasugi realized that, with the advanced capabilities of biaxial rotation, scaling and zoom, learning how to program the MEGA-CD-ROM was going to be difficult. Add to that, the fact that Sega hadn't finalized the specs or provided a development system. Sega's best recommendations on how Micronet could proceed was to treat the game as a high memory cartridge and, when the development system became available, the digital audio and effects could be added later.

HEAVY NOVA CD

With a solid commitment behind CD-ROM, Mr. Nakasugi started on the game design. Inspired by the computer version of Prince of Persia, Mr. Nakasugi aimed for the same style of fluid animation and smooth scrolling that Persia boasted. Since the method of creating this type of special effect (rotation, scaling etc.) was not available, (Sega had not decided on the amount of internal CD-ROM memory until just before the system's unveiling at the Tokyo Toy Show in June) Mr. Nakasugi set out to make a more conventional type of game but with more attention paid to accomplishing the ultra smooth animation. Not content to just make another side scrolling shooter (which isn't as popular in Japan as it is in America), Mr. Nakasugi set out to add extra features that would make the game special and

different from the rest. With extra memory available, he decided to add a two player 'battle' mode that not only would add more variety but, by bringing in two players, his Heavy Nova title would become a game that players would want to share with their friends even after they beat the standard adventure.

Having decided on the format, Mr. Nakasugi set out to work on smoothing out the character animations in Heavy Nova. In normal cart games, where programmers must work with a limited amount of

memory, the on-screen character moves along by just 'sliding' his feet forward and backwards. When this technique is 'printed' on the screen fast enough it gives the illusion of walking. In Heavy Nova the on-screen character actually picks up his feet and walks like we do. The result is a very dramatic difference in the way on-screen characters animate and interact. Also, extra attention was given to the multi-levels of parallax scrolling that serves as a backdrop to the action.

The audio portion of the game has been created, from the start, in

The headquarters of Micronet of Japan, where the Heavy Nova game was developed for CD-ROM!

true digital format as well since memory is not a problem with CD games. A total of 15 full length soundtracks were created, with Mr. Nakasugi himself responsible for six of the soundtracks and the Studio River Kids (a popular group in Japan) supplying the remaining nine tracks. All were recorded directly to Digital Audio Tape and converted to CD format through the new Sega CD development system. The result is background music of such high quality that it has to be heard to be believed!

Now, 8 months after the initial programming began, Heavy Nova is finished and in Sega's hands for approval. Judging from the comments of the editors of all the Japanese game magazines in attendance during the CD's unveiling, Heavy Nova will be one of the 'hottest' new games.

But this intense CD-ROM game will only be seen by game players in Japan. Fortunately, Micronet's U.S. subsidiary - Bignet (headed up by Mr. Kyoza Okazawa), will be converting the exceptional Heavy Nova adventure and converting it into an 8 Meg cartridge game for December release here in the America. Even without the digital audio, the graphics, animation and game play of this super cart are of such high quality that it truly stands out from the crowd. With plenty of action and challenge, Heavy Nova the cartridge is sure to capture as large of an audience here as the CD-ROM title will in Japan!

The MEGA-CD-ROM will take both a cartridge and CD.

SEGA AND MICRONET GIVE EGM EXCLUSIVE LOOK AT THE FIRST PRODUCTION MEGA-CD-ROM AND GAMES

On September 8, 1991, Sega, in conjunction with Micronet of Japan, debuted the world's first production Mega CD-ROM drive to the key editorial press. Also on display for editorial evaluation was one of the first CD games, Heavy Nova from Micronet.

For this monumental event, only twelve magazines and several newspapers were invited to attend. From Japan, the magazines included: Megadrive Beep, Famicom Sushin, The Super Famicom, Megadrive Fan, Hippon Super, GameBoy, Popcom, Logn, OHI X and Comptque. Tawain Electronic Entertainment also attended and from the U.S. EGM stood as the only representative to be invited. A spokesperson stated "...we feel that the best way to demonstrate the amazing performance of the MEGA-CD-ROM was to invite the editorial staff of the main magazines of the world and to have them try the product out first hand." When questioned further, he stated that "...Electronic Gaming Monthly, because it is the only United States magazine that covers international hardware and software, was the logical choice to represent that country..."

From Sega, Mr. Kazutaka Yano, Manager of CP Planning and Con-

trol Division, brought the first Mega CD-ROM (serial Number 001) Mr. Akihiko Murakami, President of Micronet of Japan, provided his company's Heavy Nova game. The press conference was held in Sapporo, Japan.

Now that the MEGA-CD-ROM is in production with an on-sale date in Japan of December 2, 1991 plus or minus one week) Sega is now talking price. While still tentative, the unit is currently scheduled to be 49,800 yen (about \$370). As typical with most Japanese video game hardware, there will not be a game packaged with the MEGA-CD-ROM. On or around the December 2nd date though, several companies are planning to have CD software available. Micronet will have Heavy Nova; Wolf Team will be showing Earnest Evans and Faria while Hot-B hopes to have Detonator Organ. Sega's own projects - Sm Earth, Dark Wizard and 3x3 Eyes: Devil Legend, are in various stages of development and haven't been given official in-store dates. At least one, probably Sm Earth, would have to be available by the time the hardware gets in the stores. Some licensees are expressing concern about getting

software out this year because MEGA-CD development systems have not been available until just recently. To compensate for this, some companies began development of their first games in 8 megabit cartridge format and are planning to add the audio portion

of the game when the CD development system becomes available. At that time they will quickly add CD soundtracks and voice to fill up the game disc.

Also, since CD's are a new format for Sega, it is quite possible that there may be delays in getting a pressing plant lined up to stamp out the new games by December.

EGM makes the news in Japan! In this photo, reprinted from a newspaper covering the event - EGM Editor Ed Semrad, goes head to head against the Editor of Hippon Super on the new CD-ROM game Heavy Nova.

Capcom is bringing their arcade smash, *Magic Sword*, to the Super Famicom. You choose between either a male warrior who wields an axe or the female warrior who is skilled with the sword. Travel through a ravaged land, destroying monsters and other foes as you try to make it to the castle of the main Boss. Along the way you can free captured characters that will join you on your adventure. Not only do you receive extra help, but also the extra firepower needed to complete this excellent arcade translation.

Choose either a male or female warrior at the beginning of play!

The Story

The year is 1938. Strange phenomena begin to take place on the surface of the earth. Earthquakes and volcanic eruptions become rampant, altering the geological balance of the world. Scientists of the day were summoned to discuss the possible reasons and representations, if such phenomena were to continue. It was decided to mobilize a team of scientists and experts to explore the interior of the phenomenon. The Marine Corps was recruited to provide the crew, and an underground Vector Ziles Research, the VZR, otherwise known as the "Worm."

JOE MONTANA 2

Sega/Genesis

This cart is loaded with more graphic content and even more stats than the original!

The main man named Montana is back for some more 16-bit action! Join the 49'ers QB in a rockin' good game of football filled with more plays and variety!

Start off from an angled overhead view of the action and then zoom into the play to see even larger characters and harder hits! Master different play styles to intercept, protect, and score big! Better than the original in almost every way, Joe Montana Football 2 is one of the best sports games we've seen on the Genesis!

Zoom in from an overhead perspective

to a close up. Everything becomes more detailed in this new mode of play.

MARIO LEMIEUX HOCKEY

Sega/Genesis

Loads of intense hockey skills are needed to hack your way to the cup!

The latest in Sega's line of popular sports translations for the Genesis is hockey and the popular Mr. Lemieux is bringing it to you on the 16-Bit! Pick from the hottest teams in the NHL to compete in a major stick slamming, slashing, and hooking fest filled with some of the hottest graphics you'll ever see in a hockey title! This game combines close-ups shots of specific parts of play (like the face off and the frequent fights that are bound to break out) with a fast-action scrolling contest that features full teams of skaters going toe to toe.

Pick a fight and duke it out to see who goes back into the game and who gets to spend time in the penalty box. The fights are a great addition to the fast-paced hockey action!

The latest slam-fest, Mario Lemieux ice hockey, is coming soon so you can hit the ice!

NINJA GAIDEN

Tecmo/GameBoy

EGM EXCLUSIVE!!

One of the most successful video game titles ever has just been translated to the GameBoy. The warrior Ryu must take on all new forces of evil and defeat them once and for all! You will need to use all of your ninja skills, including a special grappling hook to latch on to the ceilings! Flip onto bars and swing your mighty katanna blade across the deadly foes who seem to attack from every direction! Finally, unleash the power of the ninja magic using your incredible training!

Don't count the enemy out, however, for they have a devastating army of their own! Some characters will wield huge machine guns while others will try to attack you with their destructive flame throwers and giant missiles. Grab your sabres and take on the deadliest forces of them all - the end Bosses that each wield even more firepower! Great graphics and Ninja Gaiden game play combine to make GB Gaiden a top notch effort!

LEVEL 1

In the first level, you'll meet up with missile firing turrets, grenade tossing enemies and many more different characters including a leaping Boss that hangs from the ceiling!

LEVEL 2

Level 2 contains many more nasties like flame throwing creeps, machine gunnin' thugs, and an army with huge flamers and a major additude! The Boss has a little pal that will slow you down.

INCREDIBLE INTERMISSIONS LET THE STORY UNFOLD...

The presence of the many cinema scenes allow the GameBoy to visually plot the storyline! All of the stunning style of the original is back including these super cool pix!

BLASTER MASTER BOY

Sunsoft/GameBoy

The classic cart Blaster Master has been changed and reduced in size to fit perfectly inside the successful GameBoy. The heroes in the half shell are back in the arcade

again! Ready for Shredder and his evil gang of thugs, the subterranean quartet must foil yet another one of the masked villain's schemes for domination while restoring peace to the streets!

The basic theme of the second Teenage Mutant Ninja Turtles arcade game remains similar to the original. Pick any one of the four hard-backed reptiles and hit the streets! You must use your ninja skills as well as your weapons if you are to stop the

followers of Shredder, including new opponents that hail from the stars!

With even more detailed graphics scrolling by as the backdrop to the action, Teenage Mutant Ninja Turtles introduces the familiar "gang-play" game mechanics that let you and your friends take on the enemy as

Shredder's misguided minions. Only together, with your combined strength, can you defeat the powers against you and eliminate the Shredder's threat once and for all.

Each of the multiple levels of play are comprised of several action sequences that take place before a scrolling background setting. These scenes take you from the city streets to a sailing ship, with each successive level presenting its own unique dangers and challenges. After beating your way past the forces of evil, you will confront an epic Boss enemy that possesses even

more powerful capabilities. The Bosses are all very tough, requiring multiple hits to vanquish!

Turtles...Meet Mr. Sime!

The graphics in the new Teenage Mutant Ninja Turtles game, like its predecessor, are first rate. The detail in both the Turtles and their enemies is exceptional, with superior animation that provides a very real look and feel to the game. Advanced features, such as scaling and rotation are also used in abundance to add to the overall effect of the game. Instead of simply beating some challengers into oblivion, our heroes can now throw the enemy right off the screen! The

THE TURTLES RETURN!!

Making their second appearance in the arcades is only the tip of the trouble Konami plans to get the quartet of half-shelled heroes into in 1992! From a third installment on the Nintendo 8-Bit to a whole new adventure rumored to be patterned off of their upcoming coin-op sequel, the Teenage Mutant Ninja Turtles will see an abundance of active duty against Shredder and Co.

Leading off the pack will be the long-awaited third chapter in the Turtles saga. This game will reportedly combine many of the most popular themes from the first two games against a totally original action backdrop.

Teenage Mutant Ninja Turtles Part Three will give you the ability to choose from any one of the four crime-fighters at any time. The majority of play will maintain the side-view perspective from the arcade versions, although new power-ups and enhancements will be included. The graphics and animation of the new 8-Bit game will also be improved according to the company.

enemy now comes hurtling off of the screen and straight toward you! This dazzling effect has to be seen to be believed!

The Bosses are Incredibly Huge!

The basis of an upcoming home sequel, Teenage Mutant Ninja Turtles 2 will most certainly become an immediate smash! With the advanced technology and crisp graphics, however, it is doubly the full intensity of the game can ever be captured in a cartridge. Be sure to experience the full scope of the Turtle's second adventure, and get a taste for what the 16-Bit translation may be like when it's released next year! From beginning to end, this action game is all-out intensity!

LEVEL 70**

NO TIME TO SPARE!

This level is a time muncher! The clock is just large enough to reach the exit if you know what to do. Key points to remember: Use the block to reroute the ship. After you trap the first bug behind the wall, run back to the first gravel tile and avoid the oncoming bug. Shove the blocks on the ice into the water to the left. This will give you a clear path later. Touch

the firetrap button then run back to the cubby hole to avoid the firefly. After retrieving the red key you will need to push the block onto the trap button. This will release the bugs to the left, so keep moving to the safety of the gravel tile below. Now you are clear to go through the red door and exit.

Hide in this location to avoid the fireflies!

Take a rest here before plotting your next path!

Look out for the bugs!

**PLAYHOUSE
LEVEL 90**

DECOY HEAVEN!

The Playhouse is full of wonderful and exciting decoys! Right from the beginning, one of the blocks hides a firetrap. You can't get many of the chips. They are there mainly to trap you. In fact, spike shoes are here, but they are also unattainable. First look for the secret wall to the left and get the yellow key. Then work your way to the middle and get the blue key. Create bridges

with the blocks to go across the water. Enter the blue door and ride the ice to some chips and the green key. The green door is to the middle-left. Push the blocks up the wall on the left to cross and get the fire shield. Finally, get the last of the chips and enter the exit!

Your first goal is to get the yellow key!

SUPER NES BUYER'S GUIDE

SUPER 16-BIT HARDWARE! SUPER CHARGED GAMES! SUPER NINTENDO!

A new era has dawned on the video game hobby and its potential impact may very likely dictate the future of gaming as we know it today. With advanced game hardware available from Sega and NEC, Nintendo has at last made their own launch into the 16-bit arena with their new Super NES!

Unlike any other consumer game system before it, the Super NES captures the crisp color and detailed graphics that today's players are demanding. In addition to the basic improvements in sights and sounds over the blockbuster NES, however, Nintendo has thrown some extra goodies into their machine that are guaranteed to help it stand apart from the crowd.

First and foremost, Nintendo has given their new hardware the extra muscle it needed to accomplish advanced special effects like scaling and rotation. These two features, when activated through the software, allow the Super NES to display visuals unlike anything you've ever seen before!

Secondly, Nintendo hasn't lost sight of the fact that music, sound and speech can play an important supporting role in the success of a video game system. They're to be commended on the audio chips inside the Super NES which, represented by games like *Actraiser* and *Final Fantasy 2*, blast out the best tunes I've ever heard from a home system - including some CD-ROM games!

In short, the Super NES, which EGM previewed over two years ago, has lived up to the promises that Nintendo made. That's not to say the system isn't without its shortcomings. The most important flaw in the Nintendo 16-Bitter is the unit's inability to display a large number of different items on the screen at the same time. From the initial games that we've previewed, a combination of flicker and game slow down has occurred that severely detracted from our overall enjoyment of the games. This is especially true when the game throws more objects on the screen to make contest even more challenging. Game players don't want to finish their new games overnight and when some of the titles actually get easier, because of unexpected slow-down, it defeats the purpose.

Despite such problems, many new and exciting possibilities are now open to game developers and players alike as we enter the next phase of video gaming with the Super NES!

SUPER NINTENDO IT'S HERE!!!

The Long awaited Super NES is finally available to the U.S. gaming public. The first few pieces of this fantastic unit hit the store shelves on August 23rd, 1991. Nintendo, however, released the first production run without any heavy fanfare or spectacular announcements. The original system known as the Super Famicom in Japan was uncovered by EGM over 2 years ago in an article that detailed the marvelous features of the machine. Ever since the knowledge of this system was exposed, an unparalleled anticipation has been building even though Nintendo denied the very existence of a 16-Bit system in development. Now the 8-Bit market is on its last legs due to fierce competition from the super successful Sega Genesis and the TurboGrafx-16. Nintendo has unleashed their weapon and the real 16-Bit battles begin this Christmas as gamers and parents are faced with a choice high powered video game systems. The Super NES is the only home video game system capable of performing true scaling and rotation functions. The results are truly phe-

nominal and titles such as Nintendo's F-Zero and Pilotwings are perfect examples of these advanced effects. The Super NES also has the largest palette of colors available on any existing 16-Bit system. Compare a whopping 32,768 colors to Genesis and TurboGrafx-16's palette of only 512 colors. Unfortunately the Super NES also has the largest price tag among the competing 16-Bit systems.

Coming in at just under 200 dollars. The machine also has a very bad problem with flicker and slow-down when a large number of characters appear on the screen. Regardless, the next Nintendo is here!

Super NES - Konami Legend of the Mystical Ninja

Type: Action Release: Oct.
Levels: 24 Difficulty: Avg.

The second in Konami's Super NES releases, the *Legend of the Mystical Ninja* throws almost every game theme you can think of into the same pot, throws in several unique features and stirs them together in a multi-round quest to stop a horde of sinister forces.

Either alone or with a friend, you must overcome the dangers presented and locate a myriad of hidden items and games to win!

What a game! Talk about overkill, *Mystical Ninja* has it all! From cameo appearances of your all-time favorite Konami hero to some solid one and two player options, this game has it all! The graphics are too cheery for me, with lots of pastel, but besides that it's killer!

This cart has the kind of game play that made the NES carts so fun to play. There are plenty of different options and late bonuses such as a miniature *Smash Bros.* actually lets you play games! Good graphics and an awesome soundtrack make this one of the better Super NES games.

Finally, a unique game that has all sorts of neat and amazing tricks that will dazzle you enough! Hilariously cute and comical creatures and play that is really impressive! Even the short games that you can play (from going to the actor *Gradius*) are a great addition! *Kudos to Konami!*

Legend of the Mystical Ninja is an overwhelming game with fast action and dozens of special playing features. While the game is a gem in the one-player mode, the whole pace of play really picks up when a friend joins in! Despite the odd graphics, a great game!

Super NES - Capcom U.N. Squadron

Type: Shooter Release: Now
Levels: 10+ Difficulty: Easy

Based on the sleeper Capcom arcade title, *U.N. Squadron* mixes intense shooting action with just a drop of strategy against a battlefield setting. As a pilot from Area 88, you must repel an enemy invasion advancing by land, sea and air with your fleet of special aircraft. In addition to the main contest, you must also collect the bounty for destroying each opposing vehicle and use that money to upgrade your craft.

U.N. Squadron is a pretty cool Super NES title with a smooth set-up and hard delivery. But overall I really didn't get down away by anything in the game. The weapons upgrades were nice and the bounty-hunter aspect of play was original, but the action never really clicked.

A shooter for the Super NES that isn't plagued with the annoying "slow motion" found in Super *R-Type* and *Gradius 3*. Spectacular graphics and sounds as well as a huge arsenal of weapons make this the most impressive shooter available yet. I wish it was a little more intense.

Capcom is really looking to be one of the best SNES producers yet! *UN* boasts some very impressive features that most shooters loose out on, like a choice of planes, weapons, and levels. The back-grounds are great, but the cart is a little on the hard side. Still a winner!

I totally enjoyed this horizontal shooter. From the style of play that lets you select your targets (as well as pick the difficulty of the opponents) to the multiple plane and weapon upgrades to the stunning graphics and sound support, *U.N. Squadron* was a blast to play! Just a little too easy.

WHAT FOUL?!

BILL LAMBEER'S *Combat Basketball*

No personal fouls and plenty of excitement highlight this bone-crunching futuristic basketball title! Dodge missiles, saw blades and more as you pound your way through the most intense contact sport ever created.

Super NES - HAL America Hyper Zone

Type: Shooter Release: Nov.
Levels: 8 Difficulty: Avg.

Hyper Zone blasts you into the future where racing takes on a whole new meaning. As you wind your way down the various patrails that present themselves, open up with your firepower and clear a path of safety for your ship! Defeat the enemies and upgrade your vehicle as you prepare for the ultimate shoot-out on the futuristic roads of the Hyper Zone!

While the first impression you get from Hyper Zone is one of total awesomeness, the three-dimensional tunnel vision effects wears thin quickly. Peel the pretty picture away and what you're left with is a repetitious fire-fight with a lack of power-ups and fewer special features.

Hyper Zone has the looks and sounds of F-Zero, but the game play is extremely limited. You never turn left or right, the game is always straightforward, and gets repetitive rather early. The graphics are cool, but there is just not enough game here to hold my interest.

This game was seriously influenced by other pseudo-first person perspective shooters like Space Harrier. Despite this, HAL started with a unique setting and their blast-a-thon, but instead of taking the concept in a new direction, we get the same old thing. In the end it was Zined that

Hyper Zone has some cool looks to it, as well as nice sound, but the game play is just too repetitive. I really liked the execution and concept behind the game but I was always hoping for more power-ups, more options and more game play. Good, but it could have been better.

Super NES - Capcom Super Ghouls & Ghosts

Type: Action Release: Nov.
Levels: 15 Difficulty: Avg.

If you've played Ghouls and Ghosts on the Genesis, then you know why it was a hit. This game is not just a translation but instead a whole new adventure created just for the Super NES. All new levels and Bosses, complete with a mix of new and old, populate this cart. Scaling and rotation are also used to their full extent to send Sir Arthur the Knight on a quest to save the Princess that is filled with danger!

This is definitely the best version of Ghouls and Ghosts to date, with plenty of action, options, power-up and wicked Bosses. The adventure is long as well, so you're sure to get your money's worth. The lack of verticle firepower is a nasty turn of events, but it's blue ribbon otherwise.

I never thought that I would look back and think the Genesis version of Ghouls and Ghosts was cheasy. After playing this cart from beginning to end the difference is like NES and Genesis. Great sights and sounds are backed by solid, super challenging game play.

Awesome, awesome, awesome! As the Genesis game did for its system, the SNES version is truly one of the most impressive carts to date! Everything from screen rotations to blizzard backgrounds to storms at sea are in this cart! A bit hard, but the challenge is welcome!

This has got to be one of the most awesome games you could ever buy for a home system. It takes a little while to get used to the fact that you can't fire up and down and there is a fair level of challenge, but for the giant Bosses and great game play I can live with the minor drawbacks.

Super NES - Acclaim Populous

Type: Strategy Release: Nov
Levels: 900+ Difficulty: Hard

Populous has remained a favorite of game players ever since its original introduction on the PC. You are cast in the role of a creator of worlds who must build and populate the lands. Provide the inhabitants of each land with the necessary weather conditions and create a climate conducive to growth. Be wary, however, since there is another who will try to destroy and dismantle all that you have created.

This game has most of the strategy overtones that appeal to computer gamers. I, on the other hand, am not a computer power fan, so it shouldn't be surprising that Populous, which has already ~~were~~ out its welcome on half a dozen other formats, failed to impress me.

Good translation or not, I don't like this game at all. It's repetitive, boring, and noneventful. The graphics are not Super NES quality and soundtrack is non-existent. Don't waste your time trying to be a god and don't waste your money on this cart. Poor game, poor theme, poor Populous.

Fans of the PC version will be doing flips for this cart! Even though the game is a bit tedious, it still represents an original concept that takes some thought to win. Not only do you have over 900 worlds to conquer, but also different backdrops like chance, the relative nature

Populous is one of those games that you either like or hate. I don't really mind so much the concept behind the game, but the moral execution is just a little too slow for a blaster veteran like myself. It's not a good game or a bad game in my book - it's just Populous.

GALACTIC GUNNERS

"So you're the new hot shot pilot for the Galactic Federation, aye? Well lend an ear rookie and learn a few things from a veteran galactic gunner.

First of all, those Silver Hawk warships you'll be flying aren't toys. They are sleek shift, state of the art battle cruisers with a load of firepower. You'll need every bit of it too! That evil tyrant, Belsar, and his metal monster spacecrafts, will fire weapons you've never seen before. And if your maneuvers are any slower than light-speed, you'll be nothin' but space sparks.

Our only chance to save the planet Darius and restore order in the galaxy, is by keeping

our pilots alive. I've seen plenty of good pilots go by the wayside because they hit the panic button as soon as they got a glimpse of those oversized monster ships. In other words, keep your composure kid. It's also a darn good idea to fly your missions with a good buddy. After all, any good pilot can use a trusty wingman.

Well kid, it sounds like they're calling your number. I hope we get a chance to talk again. Good luck, rookie!"

ARTHUR'S BACK!!!

The princess has been captured once again, in this sequel to the popular *Archie and Gnomes*. This time, however, Arthur has returned to do a big job on the new super villain. The evil wizard had once sought to capture the powerful Loki, and now he's set out to plan to exact his revenge by kidnapping the Arthur's love. The princess, it seems, is the only one who knows how to open this new evil, but not nearly Arthur's hero to get the job done. Only with the "Bracelet of Power" will our hero be able to put an end to Sargus and his evil ways.

Each level in this new game has two bosses just like the original *Archie and Gnomes*. There are 15 levels in all, but you must defeat them twice before your final confrontation with Sargus.

TREASURE CHESTS

There are many different things that you can get in the treasure chests. Watch out, though, because some of them can be harmful!

Most of the weapons you find are hidden in the chests...

If you lose your armor you might find it in a chest...

You must have on the iron armor to get this armor...

You will have special magic when wearing gold armor...

This shield lets you get hit once before losing your armor...

Use this to repel the enemies shots without losing armor...

The wizard will change you into many different things...

Watch out! Not all of the chest are helpful!

POWER BRACELET

The only weapon that can defeat Sargus! You will see this only after talking with the Princess.

THE MAGICIARD

Yes, he's back and this time he has a few more tricks up his sleeves. He'll change you into different things depending on what armor you have.

THE SIEGE CRAFT WEAPONS!

As in the original "Ghouls" games, there are many different weapons that you can retrieve during your quest. Each one of these weapons has its own unique abilities, with some more effective on Bosses while others are deadlier to regular beasts. Also, Super Ghouls has added a new type of bronze armor that will give your weapon a boost while you search for the gold armor that will endow Arthur with special forms of magic!

Level 3

Don't take the shortness of this level too lightly. There are some very difficult jumps to make, so make sure you've mastered the special double jump technique to get that extra height and extra length out of each jump. Approach the end Boss slowly and then open up full blast with the daggers. This will be the quickest way to bring the monster down and progress to level four.

Level 4

This level sees the Super NES's special mode 7 to the max! Don't get caught spending all of your time looking at the effects either, because the attack patterns of the enemies are very aggressive in this region. Pay attention to the path that you can take in the spinning caverns and try to grab up the crossbow weapon along the way. The Crossbow is the best power-up to use against the big bad Boss at the end of the stage.

Level 5

Brrrrrr, boy is it cold in here! Make sure Arthur has his armor and his anti-freeze throughout level five. The armor will come in real handy because despite the fact that their breath is frozen, the monsters are deadlier than ever! As in previous stages, the Crossbow is a very effective weapon against the Boss. Try to use the weapon and have it powered-up by the conclusion of the round.

Those deadly red-devils are back in Super Ghouls and Ghosts!—Those annoying little devils from the previous two 'Ghost' games are back and as mean as ever! Watch out because neglecting these nasties can turn this level into a nightmare almost instantly! To take out the devils as well as the Boss, grab up the Crossbow weapon and power it up with the Green Armor! This combination will work best for Arthur!

Level 6

Level 7

This is it! The final confrontation with the evil masters behind the plan to capture the Princess is in sight! But before you can take on the denizens of darkness, you must fight your way through the game, acquire the "Goddess Bracelet" and take it into the final stage where the battle between good and evil will be fought.

The Mad Gear Gang has turned Metro City into a lousy place to live. Punks, wrestlers and swordsmen lurk in every alley, subway and behind every garbage can. They've even kidnaped Haggard's daughter Jessica. But Haggard, Cody and his friends aren't going to take it lying down.

You can help them by using every punch, throw and lock you've got to eliminate these madguys for good.

Cody's lethal flying kick is just one way to get rid of the Mad Gear Gang.

U.N. SQUADRON.

Mercenaries have taken the entire country of Aslan hostage. Except for one tiny airfield they missed—the best fighter planes in the world. To save the country, you'll fly the dogfight of your life, as enemy missiles and laser cannons hammer your F2D Tigershark. Of course, you have lasers and bombs

of your own. The freedom of millions depends on you, so strike hard and strike often.

At the oil refinery, the only way to slip away from enemy attack helicopters is to blitz 'em with cluster bombs.

Use your A-10A ground attack fighter's Mega Crush Weapon to dodge anti-aircraft missiles that appear from behind the trees.

GOLDEN AXE II

THE AXE IS BACK!!

The people at Sega have been hard at work working on a sequel to one of the original Genesis games - Golden Axe. They've brought back the same characters and revamped them with new magic and special techniques, and they stuck them in new levels and put them up against a cast of even more deadly and powerful enemies. You are the only one who has the power to save the land from this evil shadow over the land.

TWO PLAYER SIMULTANEOUS

Like the original Golden Axe this version has the feature of playing with your friend simultaneously.

THE DUEL

You can practice beating certain enemies by having it out with them in a duel.

DRAGONS

Like the original version you can use the enemies pets to attack!

Use this guy to give your enemy a swift back kick in the face!

A nice whip of the tail should be enough to keep any enemy down!

The classic fire breath of a dragon can be a very useful weapon.

LEVEL 2

You got a little taste of the game but don't get too cocky, all the levels aren't as easy as level one. Watch out for the edge of the cliff, you can fall off. Try knocking the enemies off the edge.

LEVEL 3

The start of this level is the hardest part. You have to make a very difficult jump. You must time it perfectly and jump right before you fall off. Use your jump attack to beat the boss.

LEVEL 4

You start to get attacked by more enemies at one time, so take it slow. Your best form of attack for this level is to use your special attack. Don't waste your magic you'll need it for the boss.

LEVEL 5

The enemies in this level can be tough, make sure to use your magic wisely because it will come in handy against the boss. Watch out, the bosses are tough because they gang up on you.

LOOKS LIKE DRAC'S BACK IN TOWN.

Something immortal is lurking in the mountains above Transylvania. The Prince of Darkness has formed a monolith of unspeakable horror in the second ghostly adventure, *Castlevania II—Belmont's Revenge*. Four towering castles riddled with hideous creatures that would even make the mightiest of warriors cower in fear.

Nevertheless, Christopher Belmont must set out to face mobile brain matter, undead assassins, and the Iron Doll in the Stone Castle. Ghostly forces like Kumbia & Nimbler and flesh leeching jellyfish slither through the Cloud Castle. The Plant Castle is the horrific

home of Angle Mummy, carnivorous Wolf Spiders and other slimy swamp mutants. And an unspeakable array of acid spewing snake heads and moat monsters lurk in the Crystal Castle. It's crucial that you find power up items to obtain battle axes and holy water, your only hope against this underworld army.

So grab your Mystic Whip and say your good-byes. Darkness will soon be upon you.

THE BIG MOVIE ON THE LITTLE SCREEN

Another excellent movie title has arrived. Terminator 2 is here and it's ready for play on the Gameboy. Even though the game play is pretty fast, there is still little on-screen blurring. The cinema art is cool, and besides its action theme, it also has a puzzle theme to it as well. Connect the lines to make a circuit and reprogram the Terminator in the second level; you must do this before your time runs out. Terminator 2 will challenge the speed of your fingers, and the strength of your mind. There is also a variety of enemies and obstacles to overcome. You liked the movie, now here's the game.

Ryu must make his way through each level as fast as possible to succeed!

SPECIAL NINJA MOVES

Ryu can use his skills as a ninja to do many things that will help get you through this game. Master these skills for ultimate game play.

Like the original *Ninja Gaiden*, you can climb up and down the walls. In order to do this you have to jump onto a wall. This is very helpful on the levels that require you to work up from the bottom to the top!

Ryu can now grab things from underneath and scale across them. When you hang on these platforms, flip up and you will land on the top of them. This technique is very helpful in the later levels when there is no ground to walk on.

When you hang on a wall or below a platform, you can only use your ninja magic. Make sure that when you're in this position you don't get attacked by the enemy or you may be forced to use precious magic to dispatch them!

When you get to this point, stay at the top and jump to the right as soon as possible. After you get the 1-UP hurry and move to the left. You must hurry here or you'll sink into the lava!

BOSS 2

In order to beat this Boss you have to let him fly down to you first. When he gets down, he will stop and shoot. Hit him with your sword a couple of times and then quickly retreat to avoid his attacks! He will repeat this move and continue to give you the opportunity to attack!

 *Swipe your sword when you jump over to the next platform to get the 1-up.*

BOSS 3

It looks like there are two Boss at the ends

of this level, but in reality only one is real! The fake Boss can hurt you, but you can't damage him. The best way to defeat this Boss is to go in tight and nail him with your sword when he stops moving.

BOSS 4

This Boss takes time to beat and, unfortunately, you won't have much time left when you get to him so you'll have to be very aggressive. He attacks from below so make sure to be on firm ground or you won't be able to dodge him. Strike with your sword when he approaches from below. When he fires move in between his shoots then go in for the kill!

BOSS 5

This Boss takes a lot of patience and timing, but he can be beat. It is a good idea to have the

Fire Art wheel for this Boss to counter his ability to fly up in the air. The Fire Art Wheel will take care of this attack with no problem! Attack with several quick hits when the Boss returns to the ground then prepare once again for his counter!

This Boss requires a lot of technique to defeat. He will begin his attack on the opposite side of the screen and launch fireballs at you! When he does this, jump on the wall. He'll then run towards the wall you are on. Jump back down and strike him with your sword several times before returning to the wall!

BOSS 7
Look for a chance to hit this enemy with your sword. After he has been hit twice, watch out for the lightning.

CLANCY
Stand on the ledge to jump up and hit him in the face. React quickly, however, since his shots fly from below!

?
Look out, this Boss is tough! First hit him in the face until it breaks, then hit him in the red nerve center.

THE COMPLAINT DEPARTMENT...

We ordered a PC Engine and two video games from the Ultimate Game Club which advertises in your magazine. To date we have not received ANY of the items ordered. We sent them a check for \$400 which they cashed in a week but have not sent anything. We no longer want any of these items. We just want our money back. We have contacted the Better Business Bureau of Connecticut. They sent the game club three letters which have been ignored. You folks should not accept any more advertising from this company unless they are willing to do what their ads say. Please - if you can do anything to help us get our \$400 back we would be very grateful.

Brian Ray
Springfield, Nebraska

Never before have I written to a company with a complaint as disturbing as the one I am currently writing to you. I realize that you probably do not have much control over the business practices of your advertisers, but I do think when they are practicing deception and false advertising, you should be informed.

Recently, I allowed my 16 year old son to use my credit card to order two tapes from the Ultimate Game Club. I agreed to pay for overnight charges for him to receive the two games promptly. I live in Hawaii so sometimes it takes several weeks for items to arrive with the regular mail. After the order was placed, we began watching for the UPS truck anxiously after four days. Ryan called to double check the order after a few days. We were told that one of the games was on back order so he substituted. My son had called that morning to verify that it had been mailed, and he was assured that it had. The next day I received a notice from the company saying that we had to call them. We did and he was again assured that the tapes were sent. Later I was informed by a company representative that the tape in the American version was not available and had not been for some time, but for \$30 more we could have

the Japanese version. I was so upset, I asked her to just cancel the order. She said that company policy would not allow her to refund a credit on my Mastercard but she could issue a credit voucher.

Magazines such as yours have a tremendous influence upon children, and I just cannot believe that you would condone that type of business practice. I am sending copies of this to every newspaper, game magazine, government office and Better Business Bureau.

I hope you publish this letter as a warning in your magazine.

Linda Hinson
Irate Customer

(Ed. We have received numerous complaints about the Ultimate Game Club and, as of the August issue, we have stopped taking their ads because of their questionable business practices such as those mentioned in these letters. Even though

other mags continue to publish ads from this company, we feel we must warn our readers about the problems which many people have had with the UGC. Ordering games by mail should not be a harrowing experience to our readers and, for the most part, mail order companies are honest and reliable, providing those far from cities with a way to get new softs. To help out, we here at EGM have established a procedure where we can 'check up' on the mail-order companies that run ads in our mag. While we can't endorse or guarantee the services of our advertisers, we are now requiring that mail order companies abide by important rules and we will reserve the right, as we have done with the UGC, to refuse advertisements from any company that doesn't measure up. If you have a problem with your order, contact our customer service line and we will do all that we can to help rectify your problems.)

HOLY HEDGEHOGS!!!

Sonic is back and this time he's going to personally guide you through the next few levels of his wild game. The U.S. National Video Game Team will also help you increase your scores and learn all of the top secrets in this great cart. Warning: these tips may actually help you play better and we apologize in advance for Sonic, he has quite an attitude problem.

SPRING YARD ZONE ACT 1

This level will make your head spin faster than Sonic in a speed tube! Hang to the right when you hit the first springboard and you'll find this ledge filled with goodies.

This one is pretty obvious, but if you missed it, hit the switch and then hop onto the platform to get to the top.

Hit this switch for a short cut to the end of the level. Now get going slowpoke!

Halfway through this level, there is a hidden room filled with rings.

SPRING YARD ZONE 2 ACT. 2

Find this secret passage and it will let you bypass almost half of the level! You get a free life too - I'm sure you'll need it!

If you get the invincibility early in the level it will help you collect 100-rings as well as the 1-UP in the secret passage. This can be the start of a 1-UP loop that will let you max out your lives for the rest of the game.

Near the end of this level there is a secret room. Only pros can make this jump. Think you're good enough?

SPRING YARD ZONE 3 ACT. 3

There are a number of secret rooms in this level. Some have rings and others have power-ups such as invincibility and super sneakers. When you finish you will be confronted by the 3rd Boss.

Pay attention and check all of the walls wiseguy!

When you speed down this hill be sure to hold the pad to the right so that you'll enter the hidden room.

BOSS 3

This boss is rather simple to defeat as long as you keep your back

to the left when you first attack him. Move to the next block as he tries to stop you and then jump spin to hurt him. You should be able to hit twice before he gets up again.

This guy is a wimp. Hit him when he comes down and when he goes up!

LABYRINTH ZONE 1 ACT. 1

This level has a few different mysteries to it. When you first start out, be sure to get the shield at the top and as you go through the level collect all the rings you can. There are over 100 for a free life!

Give me a break! This is a little tricky but not too tricky for me. Hop up the elevator, don't use the springboard.

When the water level starts to rise, hop onto the cork for a lift to the top. Watch out for spikes!

LABYRINTH ZONE 2 ACT. 2

This level is considerably larger than the first. Be sure to get the invincibility starts at the beginning of the level, they will help you blast through some tough spots. There are plenty of rings to collect, if you get them all you will earn a free life.

This section looks like a dead end, but if you look closely the wall can be opened with the hidden switch. I bet you think you're real clever for finding that one.

LABYRINTH ZONE 3 ACT. 3

At the beginning of this stage you must make a couple well-timed jumps in order to get into the rest of the level. There is a short-cut that you can take, but there's a 1-UP loop if you go the long way.

if you fall through the hole there is a short cut, go the long way for a 1-UP loop.

Get invincible early in the level.

If you don't make the jump you will keep falling and falling. Land on the ledge, open the secret passage by pressing the switch and simply run to right to pass!

BOSS 4

You don't even have to fight him this time. All you have to do is survive this narrow passage filled with jabbing spears and limited breathing space. If the water goes too far above your head, you might as well consider yourself a goner. If you make it to the top Robotnik will just fly away like a coward.

Hey genius, get the shield before you fight the boss

THIS BATTLE IS NOT AGAINST FLESH AND BLOOD!

That's right, you are about to go against the nastiest, meanest, ugliest group of alien warmongers in the galaxy. Somehow these slimy mutants known as the Bydo have constructed one of the most destructive star fleets in existence, and they're heading straight for the Earth. This time they could care less about the resources here as they are determined to put an end to the human race. The Earth Defense League has but one hope - a special prototype ship dubbed the R-9. You have been selected to pilot the R-9 and blast through the Bydo empire and rescue Earth from the oncoming menace. The U.S. National Video Game Team is here to guide you through this incredible firefight and come out playing like a pro.

BOSS ONE

This Boss is rather weak. Avoid him in the lower left hand corner of the screen and then blast him.

When flying through this narrow passage use your droid as a shield for best results

Use Plasma Blasts to slice through these robots. Be careful, their missiles can go through the Force.

THE FORCE DROID

The Force is your most valuable weapon. Use it for a shield, or launch it into the heat of the battle for extra firepower.

LEVEL THREE

These ships fly straight at you when you destroy them. Stay in the upper right hand corner of the screen and let the Force do the dirty work.

Hide in front of this rock on the ceiling while your Force droid takes care of the enemy ships. Watch for stray shots from below.

Fly through here as soon as possible and stay to the right, until you can safely back up.

This Boss is big, but don't let his size scare you. When he opens his stomach to shoot, nail him with a Super Plasma Blast.

SUPER R-TYPE **irem**

One well placed Super Plasma Blast should take care of this nasty Bydo warrior.

Use Plasma Blasts to blow through these barricades. Watch for enemies from behind.

Beware of exploding geysers when you fly through the narrow spots.

Watch out for these pesky crustaceans. They drop from the ceiling with amazing accuracy.

This huge creature can really be a pain if you don't kill it quickly. Launch your Force Droid right into him and blast away. He should be gone in no time.

Avoid the Death Snakes that protect this Boss and go for the green eye with a Super Plasma Blast for instant victory.

RETROMAGS

Our goal is to preserve classic video game magazines from years gone by, before they are lost forever.

Thanks goes out to everyone who makes this possible. Starting with the original writers and editors, to all the people involved in acquiring and digitizing these magazines.

People interested in helping us out, in whichever way possible. Either by donating magazines, scanning, editing or helping in the distribution, visit us as www.retromags.com

We are only interested in preserving magazines which are published prior to the year 2000.

We have no desire, nor intent to profit from these scans in any way.

So please, if you come across people trying to sell these releases,

DO NOT SUPPORT THEM!

THANK YOU!
